# **Turkish Airlines Increases Destinations On Tail-End Of A Extremely Profitable 2010**

The couple of years prior to Globe War II saw the beginning of operations for Turkish Airlines, far more especially in Might of 1933. Their start in company was humble with just 4 aircraft capable of carrying merely twenty 3 passengers complete. It took them until finally 1945 to buy a lot more planes. They lately received one of the twelve Boeing 777-300ER airplanes they ordered, which is a highly advanced long-haul aircraft. The past five years have noticed the enhance in routes operated by the airline together with improved profitability. Turkish Airlines has produced substantial progress given that the days when they had only four aircraft and they've clearly discovered valuable lessons along the way. The Turkish Airlines has definitely made it large focusing on [food waste disposer](#)

By February 2011, Air Transport World, one of the airline industry's leading magazines, awarded Turkish Airlines the "2011 Market Leadership Award". This is an internationally recognized achievement for the airline that was presented during a ceremony held in Washington D.C. As we all know, the past number of years have been an exceedingly challenging environment for just about all businesses around the world. Yet the airline industry is notorious for following the general movement of the global economy. However, the strong marketing efforts and innovative management of Turkish Airlines saw them ride through the worst of the global financial crisis and still turn a strong profit.

Turkey's number one airline had a very busy month during October of 2010. The airline took delivery of the first Boeing 777-300ER (Extended Range) aircraft. The airline has ordered 12 of these very modern technological aircrafts from Boeing. Actually, Turkish Airlines is not hiding that it plans to get into the competitive US and Asian markets. They have long term strategies to continue growing all around the world. Everything about Turkish Airlines suggests that it is taking advantage of the best resources available. This is very apparent in their services. For instance, if the passenger runs a [KitchenAid food waste disposer](#) company, they're able to travel in the enterprise class.

Members with either Miles & Smiles reward programs or Elite Plus members will benefit by having their accounts consolidated together. This offers a higher level of convenience to members, who will now be able to access the miles they've earned in the same account. This isn't just for individual members, but their family members will also have any miles generated applied to them, too. Members can accumulate more miles by simply booking flights with any airline within the Star Alliance partnership, or using a Miles & Smiles credit card to pay for purchases.

It seems that passengers from the US can fly on Turkish Airlines aircraft from both sides of the country. Thus, customers have a greater number of choices when it comes to traveling as well as many new destinations they can fly to. Turkish Airlines has routes to Washington DC and Los Angeles, both important international travel centers, with a number of flights scheduled every week to and from these airports.
