UPS 747F Down in Dubai

On Friday evening a UPS Boeing 747-44AF (N571UP) crashed shortly after takeoff from Dubai Airport (DXB), UAE. Both crew members have been killed in this accident.

Flight UPS6 was bound from Dubai to Köln/Bonn-Konrad Adenauer Airport (CGN / Cologne) Germany. Eye witnesses have reported they saw that the plane was on fire before it crashed.

Video by Reuters

The aircraft was just three years old, entering UPS service off the Boeing production line in September 2007. The airframe had flown 9977 hours, completing 1764 takeoffs and landings. It was up to date on all maintenance, having just completed a major inspection in June 2010.
