Ways In Which Skywest Airlines Will Help You Travel

International airlines including Delta have partnerships with Skywest Airlines which is a leading regional airline that primarily serves the West Coast. Gradual growth through the years has led to the airline serving a great number of passengers daily that began in 1972 as a small airline in Utah. Now, let's discuss some cool things about Skywest Airlines.

One of Skywest's principal partners is AirTran. The Airline Quality Study has rated AirTran many times as the premier low-cost airline. AirTran is actually a subsidiary of the larger Southwest Airlines, but Air Tran specializes in offering passengers bargains on not only flights but also vacations and various package deals. For example, this airline offers many specials to popular vacation spots such as Cancun, Jamaica, Orlando, Bermuda and Las Vegas.

Because it is partnered with Skywest, AirTran flies to many useful destinations in America's Midwest. For example, there are quite a few flights that connect Milwaukee with cities such as St. Louis, Pittsburgh, Omaha and Des Moines. Choose AirTran if you're looking for a convenient, low priced trip.

Alaska Airlines is the most recent addition to the Skywest Airlines group. This means more flights to destinations such as Seattle, Portland, Fresno and Santa Barbara. The partnership between the two airlines commenced in May, 2011. Not only does Alaska Airlines offer you convenient and numerous flights in the State of Alaska and up and down the Western seaboard of America, it can also arrange flight and vacation packages for you to such places as Las Vegas, Hawaii, Mexico, and Disneyland. With five partners to work with, after the addition of Alaska Airlines, Skywest Airlines can offer travelers a wide variety of choices when planning their trip.

As with other regional carriers, space and other limitations may be a problem when you fly with Skywest Airlines. Larger partner airlines have fewer restrictions. On a Skywest flight, large items such as kayaks, large pet kennels, and windsurf equipment will not be allowed. Unlike some larger airlines where you can check live animals, you cannot when flying with Skywest Airlines. If you have any special needs, check before you fly to ensure that all of your needs can be taken care of. Regional airline planes are smaller limiting what you can pack or bring on board.

Many people who have travel plans close to home are forgetting about driving their vehicles and instead choosing the convenience of flight with a regional airline such as Skywest. With fuel costs going up and the economy in a slump, many travelers are opting for shorter trips and, as a result, are using the increasingly popular regional carriers. Skywest Airlines is one of the airlines that's leading the way in this renewed interest in regional airlines.
